KARUR

Profile Summary

Full-Stack Developer proficient in the MERN stack, with hands-on experience building responsive frontend interfaces and secure backend architectures. Experienced in REST API design, JWT-based authentication, database modeling, and scalable application workflows.

Technical Skills

- Languages: C, Python, Java
- Web Development: HTML, CSS, JavaScript, React, Node.js, Express.js, Tailwind CSS
- Database: MongoDB, SQL
- Tools & Platforms: Git, Postman, VS Code

Education

Kongu Engineering College 2023–2027

B.Tech – Artificial Intelligence & Data Science

CGPA: 7.66

Equitas Gurukul Matric School 2022–2023

HSC – 92.5%

Experience

SAN Technovation Pvt Ltd || Intern

Tech Stack: Python, FastAPI, Regex, spaCy (NLP), RapidFuzz

August 2025 - September 2025

- Built name extraction logic using rule-based filtering and spaCy NER fallback to identify candidate names from unstructured resume text.
- Developed an email extraction and cleaning module using regex and fuzzy matching to handle malformed formats and correct domain errors

Projects

CampusVoice - Smart Complaint Management System | [Live Demo](#) | [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Gemini API

- Built a complaint management system with JWT authentication and role-based access, enabling secure user-specific operations.
- Integrated AI-based sentiment analysis and automatic priority classification.
- Developed secure REST APIs with proper validation and protected routes.

LIVITY - Real Estate Management System | [Live Demo](#) | [GitHub](#)

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Cloudinary, JWT

- Developed a fully responsive property listing platform using React.js and Tailwind CSS, implementing reusable component architecture and dynamic data rendering.
- Designed modular and reusable React components for seller and buyer dashboards, ensuring scalability and maintainable UI structure.
- Integrated REST APIs with optimized state management and robust error handling to ensure smooth user interaction and reduced unnecessary re-renders.

Library Management System (Java Console Application) | [GitHub](#)

Tech Stack: Java, OOP, Collections Framework

- Built a console-based Library Management System using Core Java with OOP concepts.
- Implemented features for adding books, issuing/returning books, viewing availability, and managing student records.
- Designed modular and maintainable codebase.

Certifications

- MongoDB Associate Developer – MongoDB Inc.

Area of Interest

- Backend Development
